■ **MEDIA NAMETAGS**

Cut out a variety of pictures of people from magazines. Break students into teams, give them each several magazine pictures and ask them to brainstorm labels about that person.

Introduce the core Nametag characteristics:
- Gender
- Socioeconomic status
- Religion
- Race/ethnicity
- Body type
- Ability/disability

Have students brainstorm a list of Nametags for each core characteristic. Now ask students to generate a list of Nametags that was not represented in any of the media pictures.

Ask which were represented most.
